EDUCATION

University of Minnesota

Bachelor of Arts, Computer Science
GPA: 3.75/4.0

Minors in English, Mathematics
Graduated May 2016, summa cum laude

SKILLS

- Familiar with C, C++, Python
- Some experience with x86 assembly, Python, Java
- Strong verbal and written communication skills.
- Understanding of software design principles and best practices.

WORK EXPERIENCE

Associate Engineer

Unisys Corporation

September 2016 to Present

- Analyzed and developed solutions to customer issues with the OS 2200 operating system.
- Added functionality to same. One project included revising the way thread creation was throttled when system resources were low.
- Developed a prototype for an application that collected and visualized patient biometric data. Said prototype was selected for further development by senior management.

Undergraduate TA (Computer Science Department)

University of Minnesota

September 2015 to May 2016

- Led lab sections with other TAs and guided students through practical uses of classroom concepts.
- Met one on one with students to help them debug code and come to clearer understandings of class topics.
- Was highly praised on anonymous student assessments of the course.

Student Supervisor

University of Minnesota Parking and Transportation

Wilderness Guide

Camp Amnicon

June 2014 to August 2014

- Led junior/senior high school students on week-long canoe trips, providing a unique wilderness experience and maintaining safety.
- Facilitated group discussions on various themes, providing campers with a safe space to explore challenging issues.
- Dynamically addressed physical, logistical, and emotional problems as they arose, allowing campers to focus on learning and having fun.
